ZOE B&T - CONTINUED

reinforced zinc oxide-eugenol composition restorative material designed for intermediate restorations intended to remain in place for no longer than one year. It may also be used as a base under restorative materials and cements that do not contain resin components. When mixed properly, ZOE B&T material has a compressive strength in excess of 6300 psi.

Powder Refill, 25 g 8134905  [610101]
Liquid Refill, 14 ml 8134910  [610102] ▲

PERMANENT CEMENTS

DUAL-CURE RESIN CEMENT
DARBY DENTAL SUPPLY

Darby’s Dual-Cure is a self-adhesive resin cement that bonds to the slightly moist tooth. This moisture-friendly, ionic resin, is fully compatible with the moist oral environment. Dual-Cure Resin Cement forms chemical bonds to dentin and enamel, precious and non-precious metals, ceramics, composites, and fiber posts without requiring a bonding agent. The non-irritating, self-adhesive cement contains no solvents, requires no etching or drying of dentin, and provides an exceptional seal against microleakage.

Syringe Kit: 7 g Medium Viscosity Automix Syringe, 20 Automix Tips 9430075

GLASS IONOMER CEMENT
DARBY DENTAL SUPPLY

Darby’s Glass Ionomer Cement is an advanced glass ionomer formulation designed for a broad scope of uses. It offers excellent reproducibility of physical properties and setting characteristics. Darby’s Ionomer Cement contains leachable fluoride.

Kit: 30 g Powder, 15 ml Liquid, Mixing Pad, Scoop 9538810 ▲
Powder, 30 g 9538836

ZINC PHOSPHATE CEMENT
DARBY DENTAL SUPPLY

Darby’s Zinc Phosphate Cement has a low solubility to resist the breakdown in the mouth. The high strength provides a strong base which makes it a great choice for the cementation of crowns, bridges, inlays or orthodontic bands. Darby’s Zinc Phosphate cement can also be mixed to a doughy consistency and used as a base or temporary restoration.

BLOCK OUT
DENTMAT

Block Out is a multi-purpose, dual-cure cement designed specifically for bonding porcelain restorations. It was developed based on the successful advanced resin technology of Ultra-Bond but includes a masking agent to successfully block out staining on teeth.

Intro Kit: 4 x 3 g Syringe (A1, BO, B1, Supreme White), 4 x 1 g Try-In Paste Syringe (A1, BO, B1, Supreme White), 3 ml Etch ’N’ Seal Syringe, 2 ml Ceri-Prime, 1 g Porcelain Conditioner, 3 g Tenure Dab-Eze, 10 Auto-Mixing Tips, 12 Pink Intra-Oral Syringe Tips, 3 Light-Cure Test Rings, Brush Tip Handle, 25 Brush Tips, Mixing Pad 8890164 [032492110]

BREEZE
PENTRON

This self-etch formulation incorporates new resin technology for enhanced bond strength with greater reliability. Upon application, Breeze Cement quickly goes to work to condition dentin, enamel, and the restoration all in one quick and simple step. By eliminating the etching, priming and bonding steps, both postoperative sensitivity and procedure time are drastically reduced.

Intro Kit: 5 x 4 ml (3 x A2, 1 Translucent, 1 Opaceous White), 3 ml Silane, 40 Automix Tips, 10 Intraoral/Automix Tips 9470070 [N97]
Silane, 3 ml 9470142 [N04EA]

CALIBRA ESTHETIC RESIN CEMENT
DENTSPLY

Calibra Esthetic Resin Cement combines ease of use, excellent handling, and shade-stable chemistry in a versatile light-cure/dual-cure system. Calibra Cement provides best results in all ceramic crowns, PFM crowns, inlays/onlays, veneers, bridges, and all cosmetic indirect restorations that demand uncompromising aesthetic bonding and strength. Its low solubility prevents margin disintegration and it provides low film thickness.

2-Part Complete System: 5 x 2 g Base (Translucent, Light, Medium, Dark, Opaque), 2 x 2 g Catalyst (Regular, High), 5 x 1.8 g Try-In Paste (Translucent, Light, Medium, Dark, Opaque), 4.5 ml Prime & Bond NT, 4.5 ml Self Cure Activator, 3 ml Syringe Silane Coupling Agent, 3 ml Tooth Conditioner Gel, 25 Disposable Applicator Tips (Needles), Mixing Stick, Brush Handle, 40 Disposable Brush Tips, Dispensing Well, Mixing Pad, Light Cover 8133850  [607060] ▲

Operatory Kit: 2 x 2 g Base (Translucent, Light), 2 x 2 g Catalyst (Regular, High), 4.5 ml Prime & Bond NT Adhesive, 4.5 ml Self-Cure Activator, 3 ml Silane Coupling Agent, 25 Disposable Applicator Tips (Needles), Mixing Stick, Brush Handle, 40 Disposable Brush Tips, Dispensing Well, Mixing Pad, Light Cover 8133851  [607059] ▲

Try-In Accessory Pack: 5 x 1.8 g Try-In Paste (Translucent, Light, Medium, Dark, Opaque) 8133852  [607058]
