**BONE GRAFTING**

**BIOPLANT**  
**KERR RESTORATIVES**  
Bioplant is a synthetic dental bone grafting material used in most indications where a bone graft is required, including socket grafting, ridge preservation, ridge augmentation, periodontal defects and implant therapy. It is non-resorbable, radiopaque and hypoallergenic.

**BIOXEN**  
**OUSIA**  
Ousia bioXEN is a naturally sourced bovine bone mineral. The unique manufacturing process of bioXEN results in a bone grafting particulate with the crystalline structure of carbonate apatite, which is a structure similar to intact human bone. In addition, the manufacturing process for bioXEN allows for a combination of a porous structure for vascular access with a roughened surface that is favorable to cell adhesion and subsequent bone matrix deposition.

**BONE WAX**  
**ETHICON, INC.**  
Bone Wax is a sterile mixture of beeswax and isopropyl palmitate (wax softening agent) that achieves local homeostasis of bone by acting as a mechanical barrier. It is sold individually wrapped in sterilized packaging.

12/Pkg.  
3261000 Sterile 2.5 g [WS1G]

**DENTOGEN**  
**ORTHOGEN CORP.**  
DentoGen is a biocompatible, osteoconductive, and completely synthetic bone grafting material. Indications for use include mixing with other suitable bone filling agents to prevent particle migration in an osseous defect, or to provide a resorbable barrier over other bone graft materials.

Patient Kit: 2 x 1 g Medical Grade Calcium Sulfate Hemihydrate, 2 x 5 ml Regular Set Solution, 2 x 10 ml Fast Set Solution

**FOUNDATION BONE FILLER**  
**J. MORITA**  
Foundation is a revolutionary bone augmentation material for use after teeth extractions. Collagen-based, it provides support for implants, bridges and dentures. Immediately following an extraction, Foundation is placed into the socket. The surrounding cells and capillaries gradually infiltrate Foundation. As the extraction socket heals, it is filled with new augmented bone. It is shaped in “bullet” form for easy placement.

**GUIDOR EASY-GRAFT**  
**SUNSTAR BUTLER**  
Guidor Easy-Graft is a polyallopatic bone grafting system from Sunstar, for socket preservation and immediate implant needs. Guidor offers a fully resorbable synthetic bone graft substitute to clinicians who prefer stability, osteoconductivity, and more placement control.

**HELICOTE COLLAGEN WOUND DRESSING**  
**INTEGRA MILTEX**  
HeliCOTE is an absorbable wound dressing made of collagen obtained from bovine deep flexor (Achilles) tendon. The soft, white, pliable and nonfriable material is used to help control bleeding, develop blood clots and protect the wound site in order for the healing process to begin.

10/Pkg.  
9901302 ¾” x 1 ½” [62201]

**HELIPLUG**  
**INTEGRA MILTEX**  
Heliplug is an absorbable collagen wound dressing made from purified bovine tendon. They provide wound stabilization and create space during guided tissue regeneration procedures. Heliplug is absorbed within 4 to 8 weeks and Heliplug Advanced is absorbed within 18 weeks.

9901316 30 mm x 40 mm [62-208]

**HELITAPE**  
**INTEGRA MILTEX**  
This cylindrical, soft, white, pliable collagen wound dressing is used to control bleeding and develop blood clots in extraction sites and biopsy sites.

10/Pkg.  
9901304 ⅜” x ⅜” x ⅜” [62-202]

**HELITALE**  
**INTEGRA MILTEX**  
This absorbable collagen product is made from purified bovine tendon to maximize wound stabilization in order for the healing process to begin.

10/Pkg.  
9901300 1” x 3” [62-200]
