

Prelude™

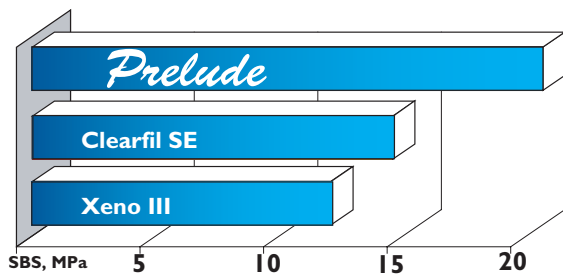

Self-Etch, Total Etch & Dual-Cure Adhesive System

- ♦ **Fast & reliable** one 10 second application per bottle.
- ♦ Use of Prelude Link and self/dual-cure composites converts Prelude to dual-cure adhesive.
- ♦ **High bond strengths to uncut enamel!**
- ♦ Nano-filled, ethanol based formula is highly stable.
- ♦ Ultra thin film thickness, less than 5 micron.
- ♦ High 5 minute & 24 hour (34.7MPa) bond strengths.

	10 sec Primer
	10 sec Adhesive
Convert light cure to self/dual cure ?	
	10 sec Link

Prelude, by Danville offers the latest in Self-Etch technology. One of the fastest and easiest to use, Prelude also offers high bond strengths to uncut enamel and self/dual-cure composites. Prelude Adhesive, used without Primer, also serves as a Total-Etch material. Nano-filler, ethanol-based formulation is highly stable and does not settle out.

Shear Bond Strength on Dentin at 5min. in self-etch technique

OptiBond Solo Plus, Clearfill SE, Unifill Bond, Xeno III are NOT registered trademarks of Danville Materials.
