HeliTAPÉ®, HeliCOTE® and HeliPLUG® Collagen Wound Dressing

Integra Miltex absorbable collagen wound dressing products are used to help control bleeding and protect the wound site in order for the healing process to begin. Collagen wound dressing products are reabsorbed by the body within 10 to 14 days after placement.

These collagen products are packaged in individual clam shells with an easy-to-peel backing, making it easy for clinicians to open packages during procedures. Each product is supplied sterile and sold in packs of 10.

Features
- Available in 3 shapes
- Helps control bleeding
- 10 to 14 day absorption rate
- Sterile, individually packaged, 10/box

Benefits
- Provides clinician with the appropriate size material for the procedure
- Stabilizes the wound during the healing process
- Promotes healing at the defect site
- Helps to reduce tray set-up time

HeliMEND® and HeliMEND® Advanced Collagen Membrane

HeliMEND and HeliMEND Advanced absorbable collagen membranes are made from purified bovine tendon. These collagen products provide wound stabilization and create space during guided tissue regeneration procedures where a longer absorption rate is desired. HeliMEND collagen membrane is absorbed within 4 to 8 weeks; while HeliMEND Advanced collagen membrane is absorbed within 18 weeks.

These products are easy to use and have excellent handling characteristics. The membrane is very pliable and does not become slippery when hydrated, making it easier for clinicians to properly place the membrane over the defect. Each membrane is supplied sterile and in an easy-to-open package.

**Features**
- Available in 3 sizes
- Excellent handling characteristics
- Wound stabilization
- Longer absorption rates
- Sterile, individually packaged, 1/box

**Benefits**
- Provides clinician with the appropriate size material for the procedure
- Material is pliable and does not become slippery when hydrated
- Helps control bleeding and develop blood clots
- Creates space during guided tissue regeneration
- Helps to reduce tray set-up time
